Subject:

How quickly could a hacker breach your business? Let's find out...

Email Body:

Hi [first.name],

If a cyber criminal set sights on your business today, how long would it take for them to exploit your employees and access your sensitive corporate data?

With human error causing 95% of data breaches, don't wait to find out the hard way...

Get your [free Human Risk Report](#) and shine a light on how a cyber criminal could exploit your staff's cybersecurity vulnerabilities today. Here's how it works:

- 👉 **Analyse the risk** — We'll scan the Dark Web to detect exposed user credentials, then launch a Simulated Phishing Campaign to assess your vulnerable users.
- 👉 **Understand the risk** — You'll get a one-page Risk Report that outlines how long it would take to breach your business, as well as your overall Human Risk Score.
- 👉 **Mitigate the risk** — Knowing your risk areas isn't enough - We'll outline how you can tackle your unique human risk areas with clear step-by-step advice.

[Request your free Human Risk Report](#) today to help your business reduce user-related security incidents, boost cyber resilience and demonstrate regulatory compliance.

P.S. Check out this [one-page overview](#) to get a better idea.
